

Jason-2 tuning & the DORIS antenna Z-offset puzzle

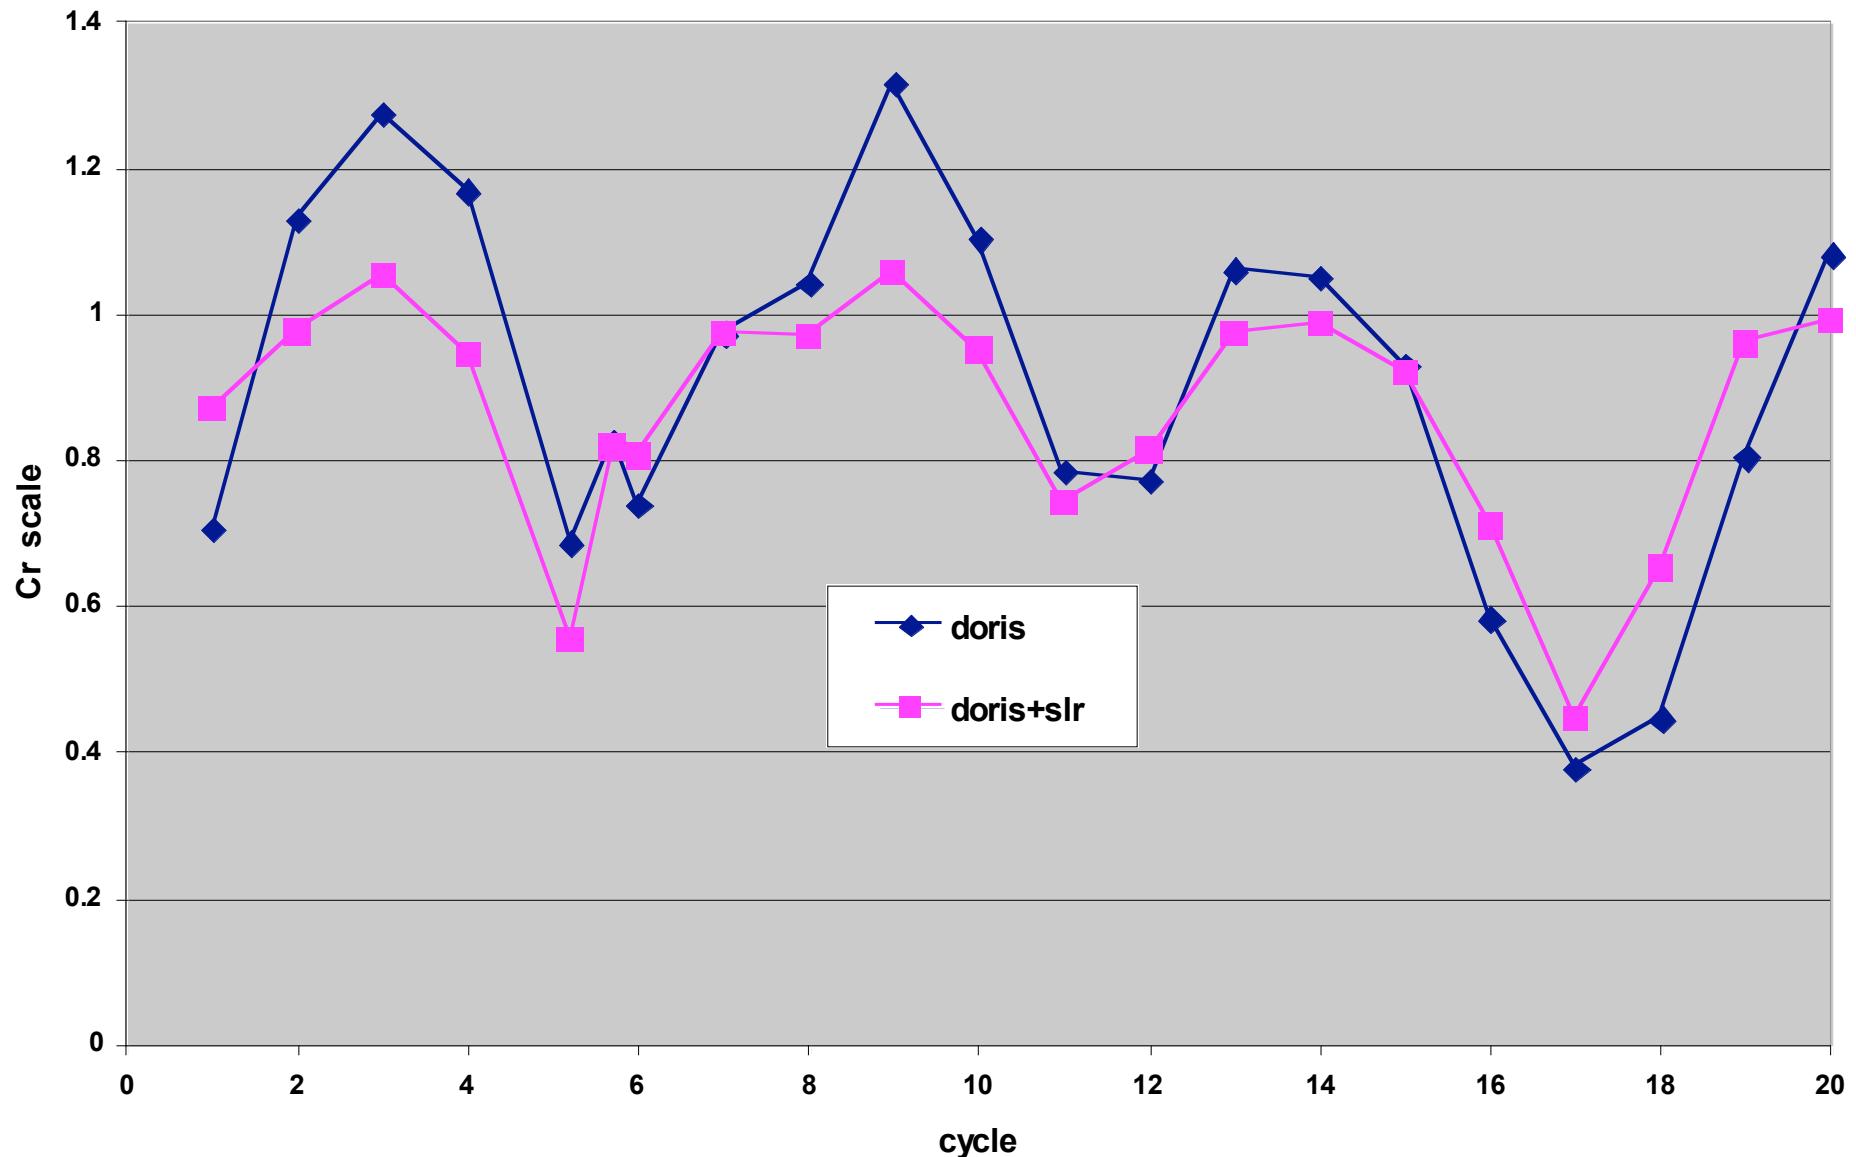

N.P. Zelensky, F.G. Lemoine, D. S. Chinn

DORIS Analysis Working Group
Paris, France
March 23-24, 2009

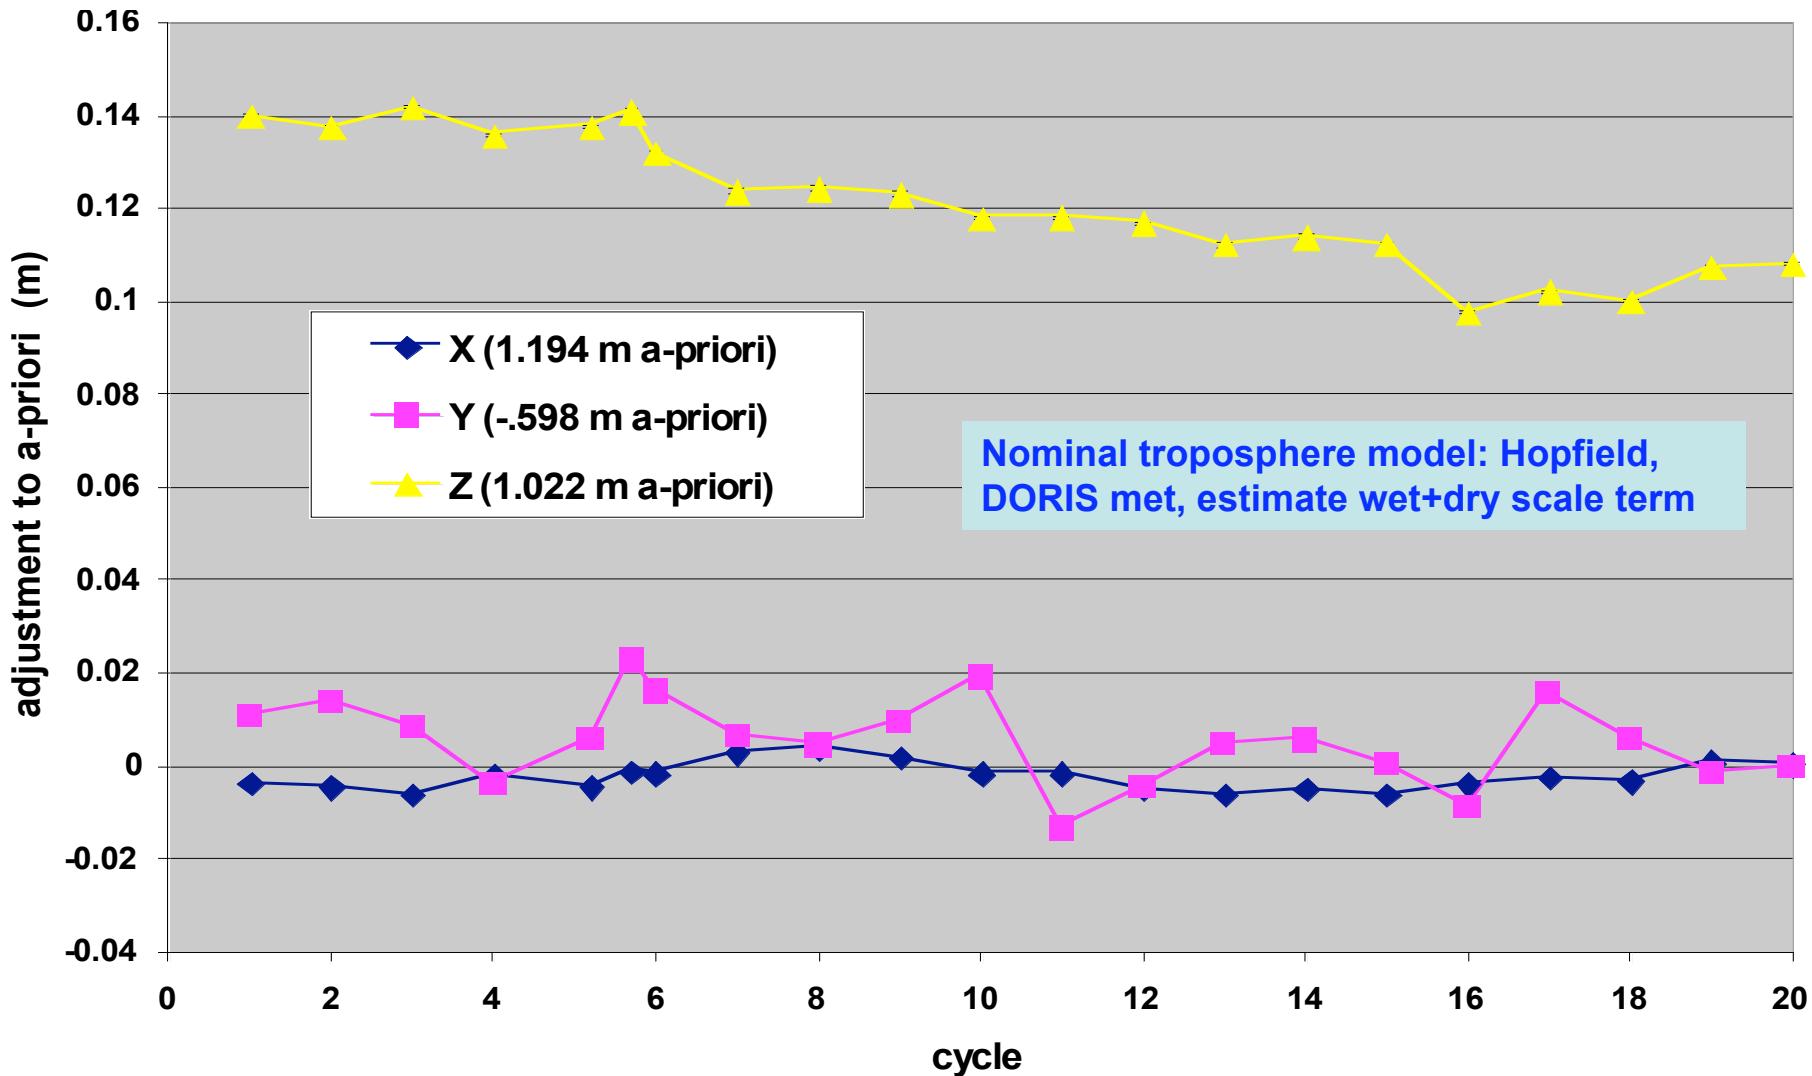

Jason-2 estimated SRP Cr (J1 panel model)

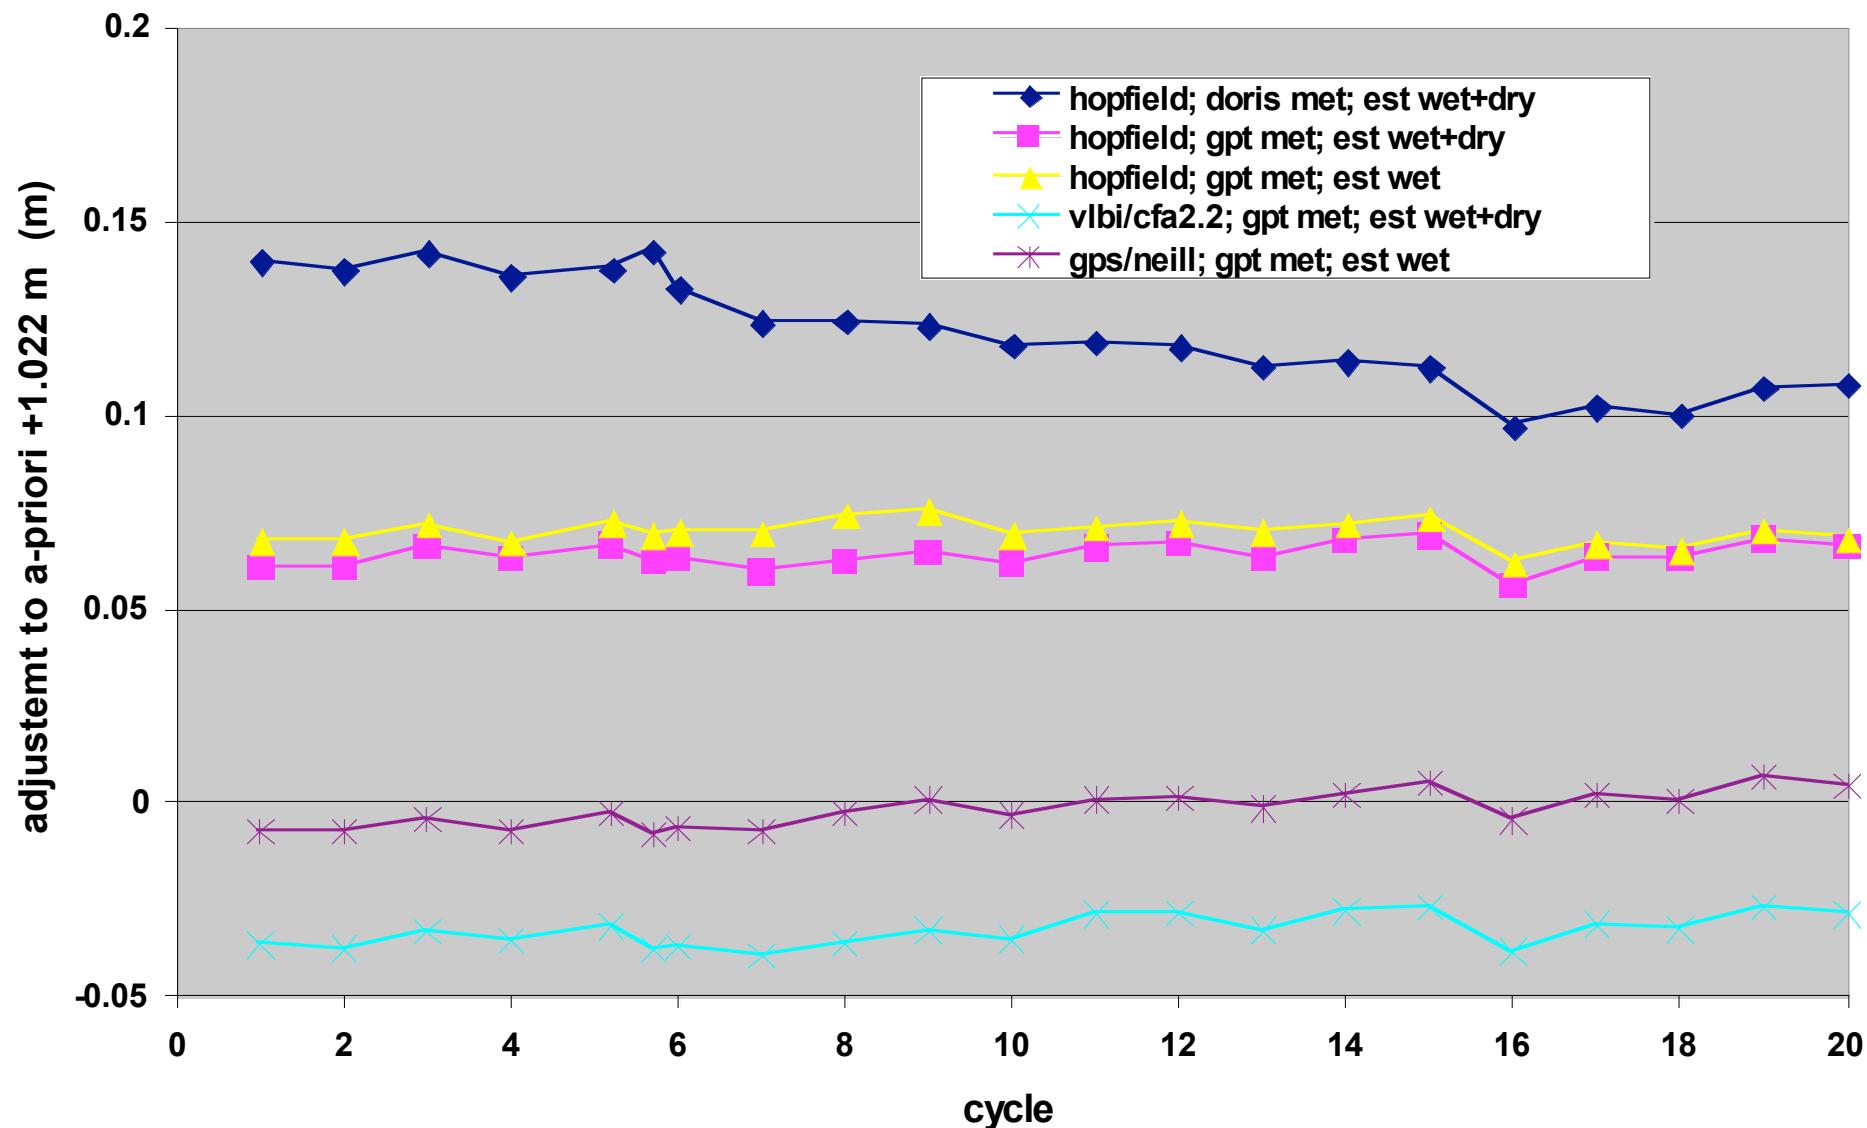

Jason-2 estimated DORIS antenna offsets

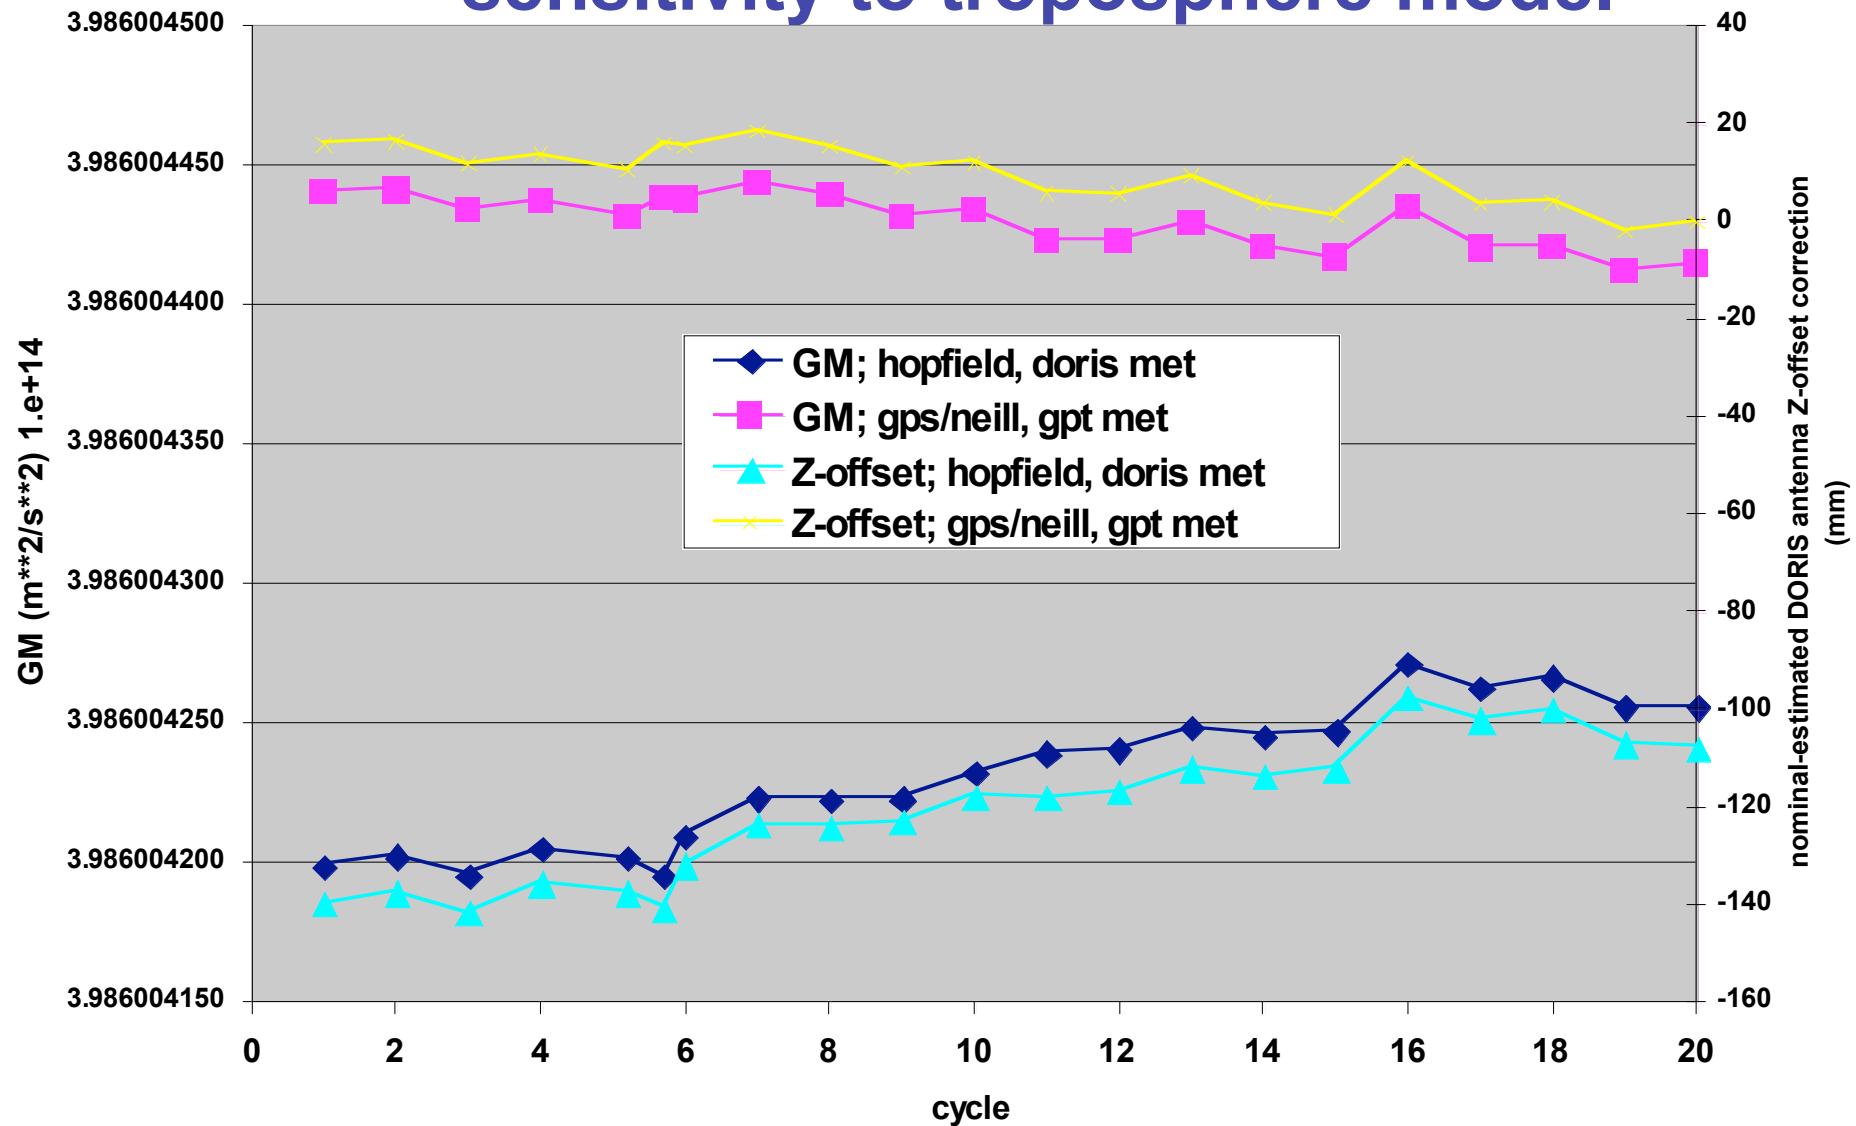

Jason-2 DORIS antenna Z-offset estimate sensitivity to troposphere modeling

Jason-2 estimated GM & Z-offset with DORIS-sensitivity to troposphere model

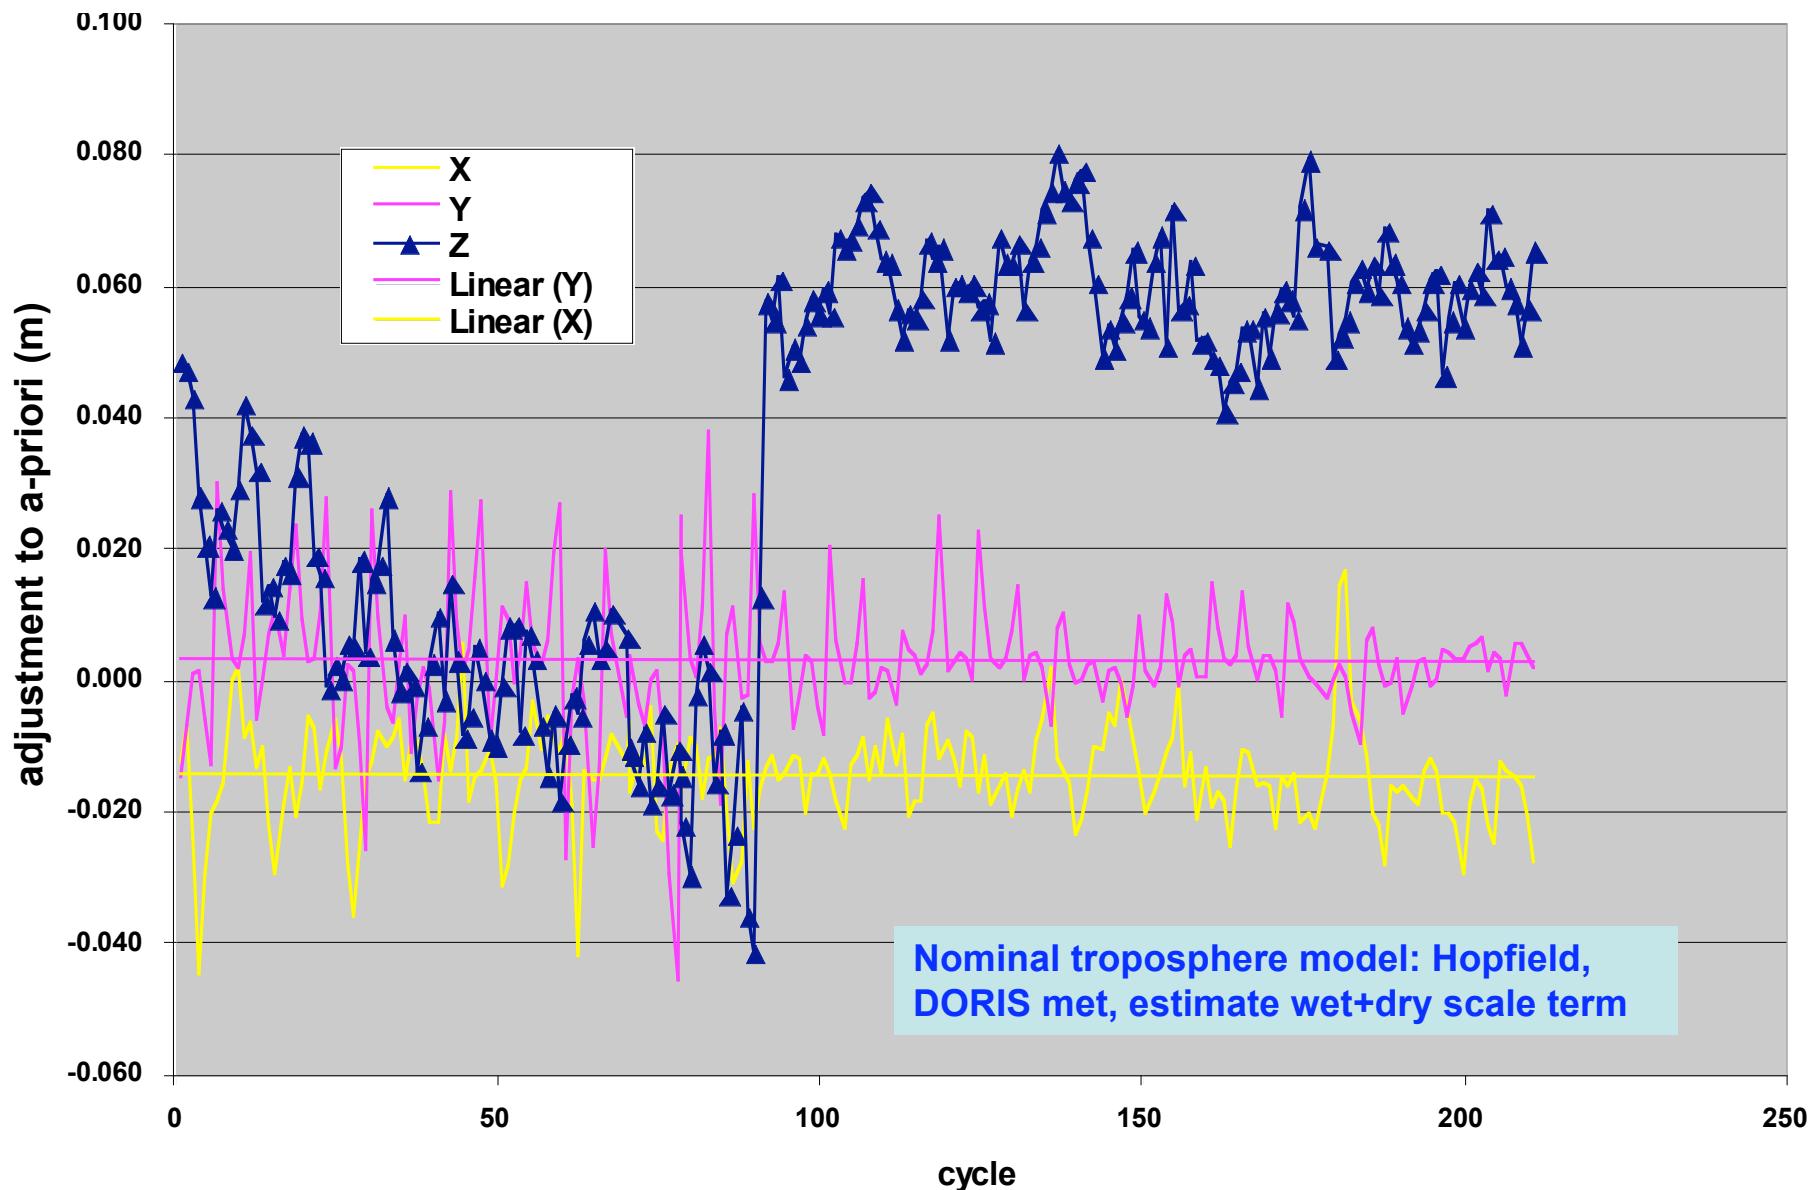

Jason-2 DORIS troposphere model tests

Jason -2 cycles 1 -20 summary doris -only	doris (mm/s)	residuals			xover (cm)	orbit difference		
		slr (cm) mean	slr (cm) rms	h (cm)		c (cm)	I (cm)	
nominal: hopfield, doris met, est. wet+dry	0.3726	-0.408	3.235	5.592	---	---	---	---
gpt02: hopfield, gpt met, est. wet+dry	0.3656	-0.224	2.645	5.593	0.06	1.58	0.27	
gpt04: vlbi/cfa2.2, gpt met, est. wet+dry	0.3666	0.018	2.247	5.597	0.15	4.25	0.74	
gpt05: gps/neill, gpt met, est. wet+dry	0.3653	-0.157	2.433	5.592	0.13	2.68	0.59	
gpt02a: : hopfield, gpt met, est. wet	0.3668	-0.100	2.465	5.598	0.11	2.49	0.33	
gpt05a: gps/neill, gpt met, est. wet	0.3652	-0.071	2.339	5.595	0.13	3.22	0.56	
nominal est. z -offset	0.3677	-0.081	2.603	5.600	0.11	2.38	0.56	

Note. SLR and Crossover residuals over cycles 1-7

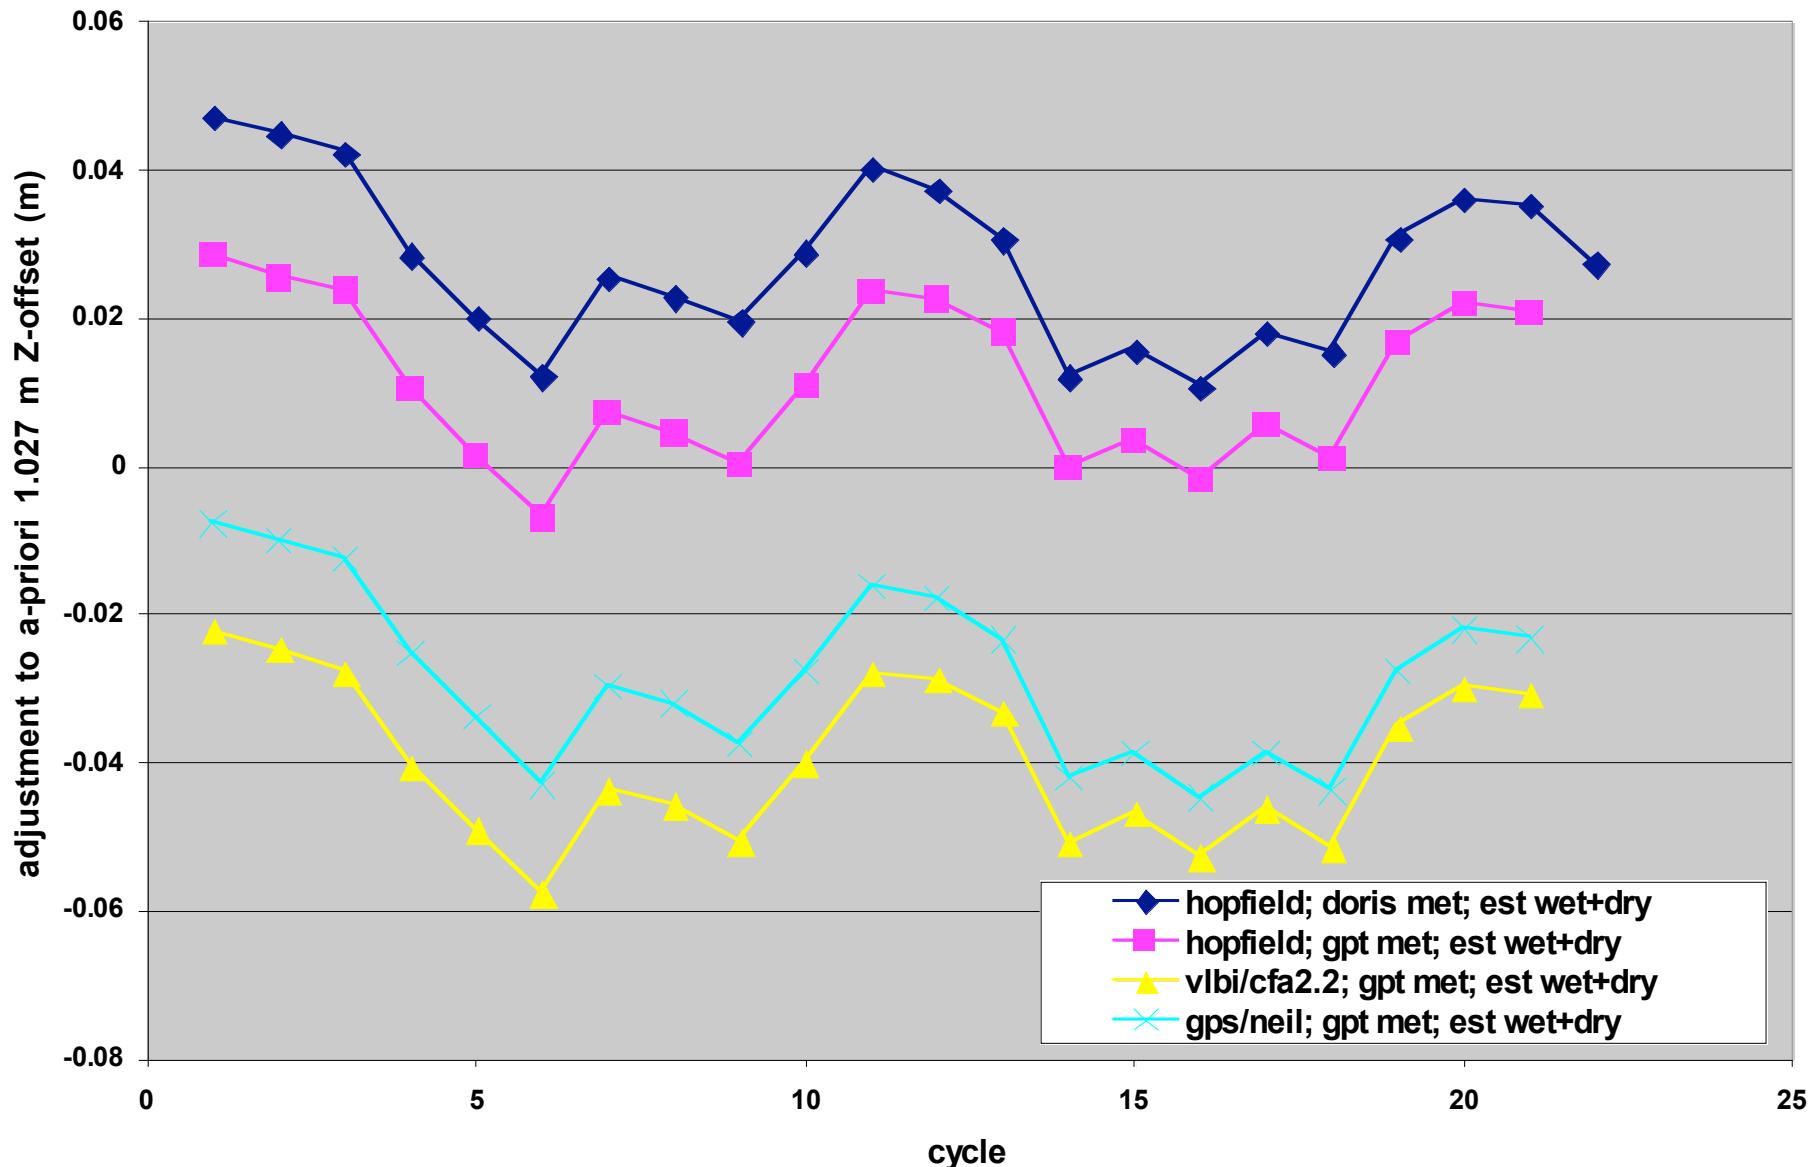

Jason-1 estimated DORIS antenna offset

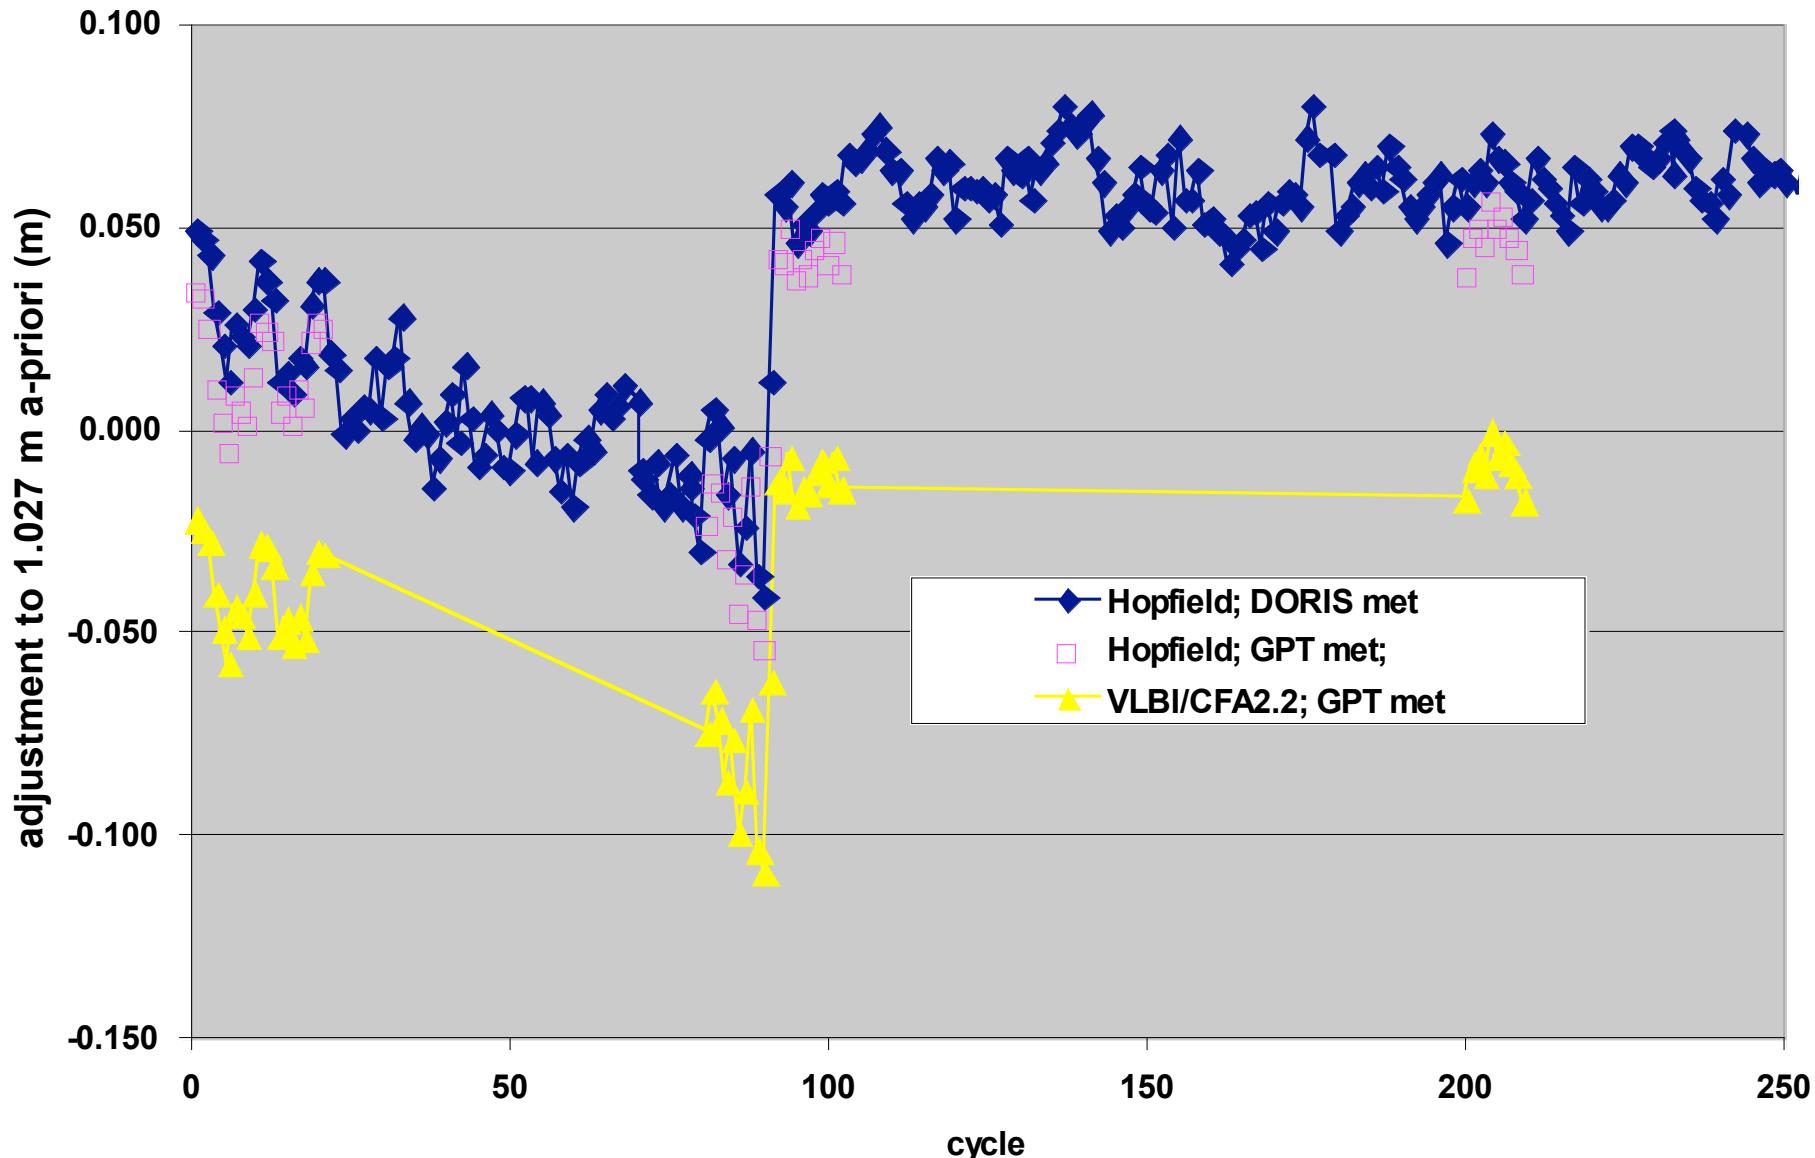

Jason-1 DORIS antenna Z-offset estimate sensitivity to troposphere modeling (1 of 2)

Jason-1 DORIS antenna Z-offset estimate sensitivity to troposphere modeling (2 of 2)

Jason-1 DORIS troposphere model tests

Jason-1 cycles 1-21 summary doris-only	residuals			orbit difference			
	doris (mm/s)	slr (cm) mean	rms	xover (cm)	h (cm)	c (cm)	l (cm)
nominal: hopfield, doris met, est. wet+dry	0.3997	-0.135	2.621	5.761	---	---	---
gpt02: hopfield, gpt met, est. wet+dry	0.3991	-0.101	2.604	5.760	0.08	0.60	0.26
gpt02a: : hopfield, gpt met, est. wet	0.3998	-0.078	2.581	5.759	0.13	0.87	0.33

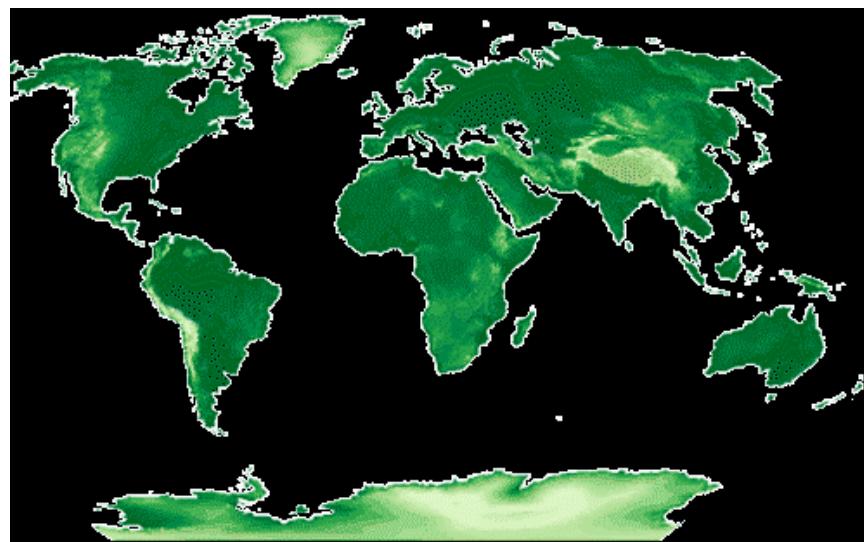

Conclusions

- J2 panel model should be tuned
- J2 DORIS antenna Z-offset estimate can be explained by troposphere model error
- GPT model offers improved pressure/temperature over DORIS J1/J2 meteo data
- J2 DORIS antenna Z-offset estimate more sensitive to troposphere than for J1
- DORIS antenna Z-offset estimate can diagnose problems with on-board oscillator
- DORIS antenna Z-offset / GM estimates may referee improvements to troposphere modeling
