

*DORIS constellation  
new commers*

---

## DORIS

- 3 new receivers added to DORIS « constellation » within the 6 last months :
  - Jason was successfully launched December 7, 2001,
  - ENVISAT was successfully launched March 1, 2001,
  - SPOT5 SPOT 5 was successfully launched May 4, 2002
  - 6 DORIS in flight simultaneously :
    - SPOT2, SPOT4, TOPEX/POSEIDON, Jason, ENVISAT, SPOT5
- New beacons developed, first already installed

==> key for precise positioning significant improvement

==> key to strengthen Earth reference system
