# DORIS NETWORK STATUS REPORT

IDS Analysis Working Group Virtual Meeting  
6-7 April 2021

Jérôme Saunier, IGN - France

**Today: 49 stations out of 59 co-located with at least one other IERS technique / 27 with tide gauges**

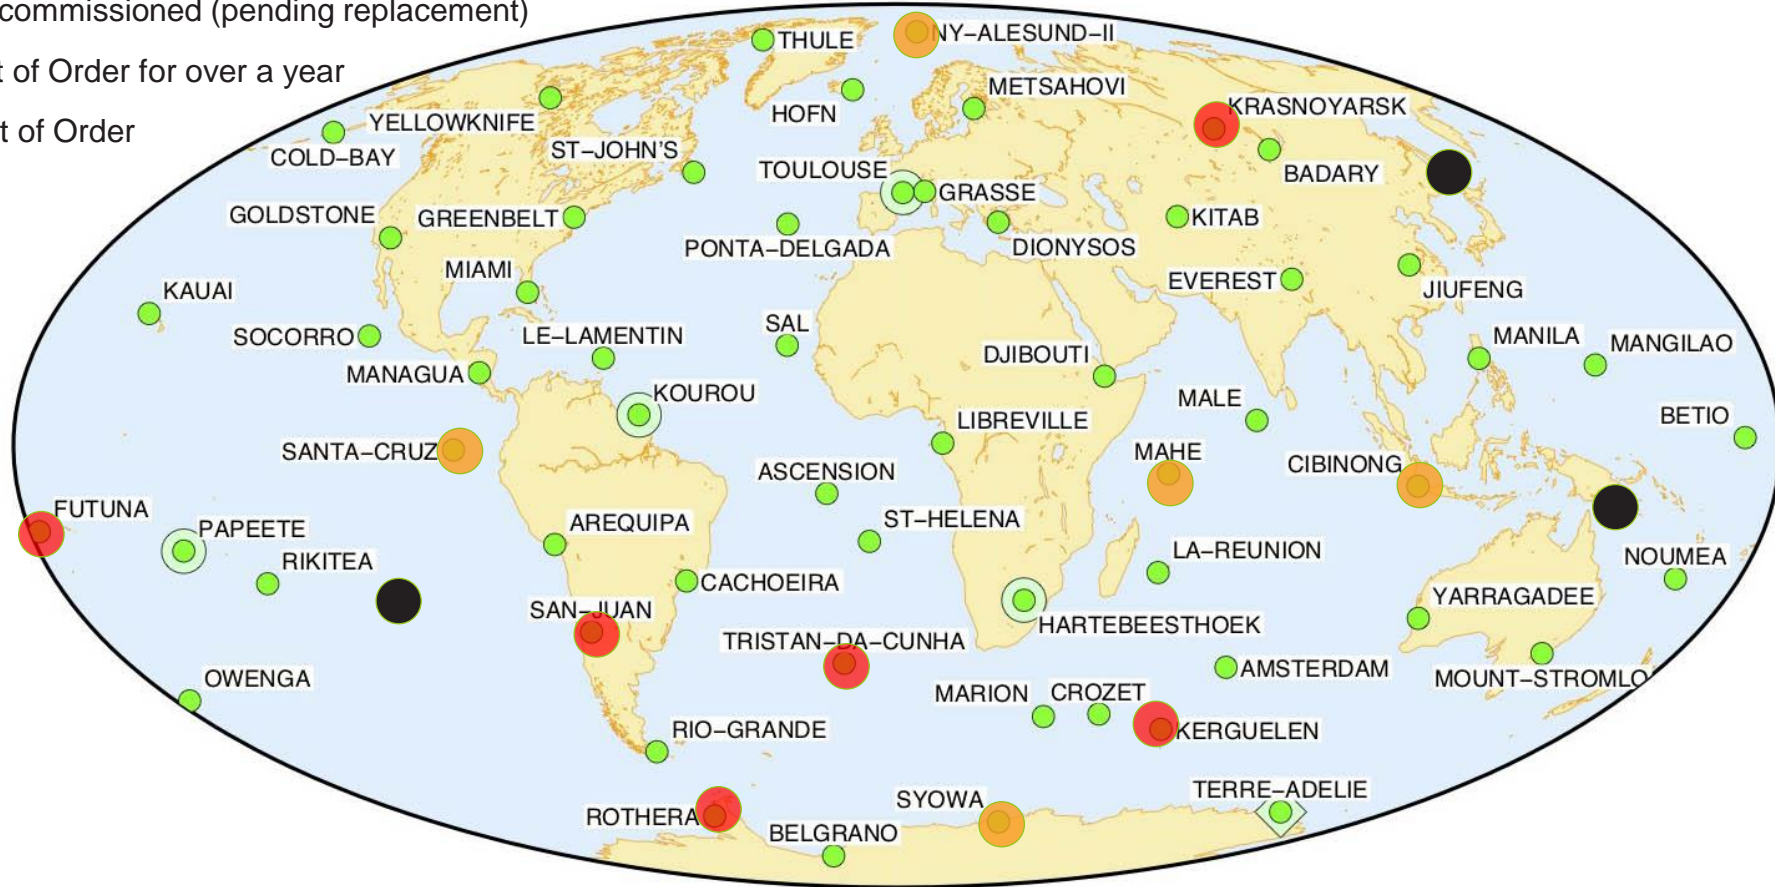

# PERMANENT NETWORK OPERATIONAL STATUS

● master beacon   
 ◇ time beacon

- Decommissioned (pending replacement)
- Out of Order for over a year
- Out of Order

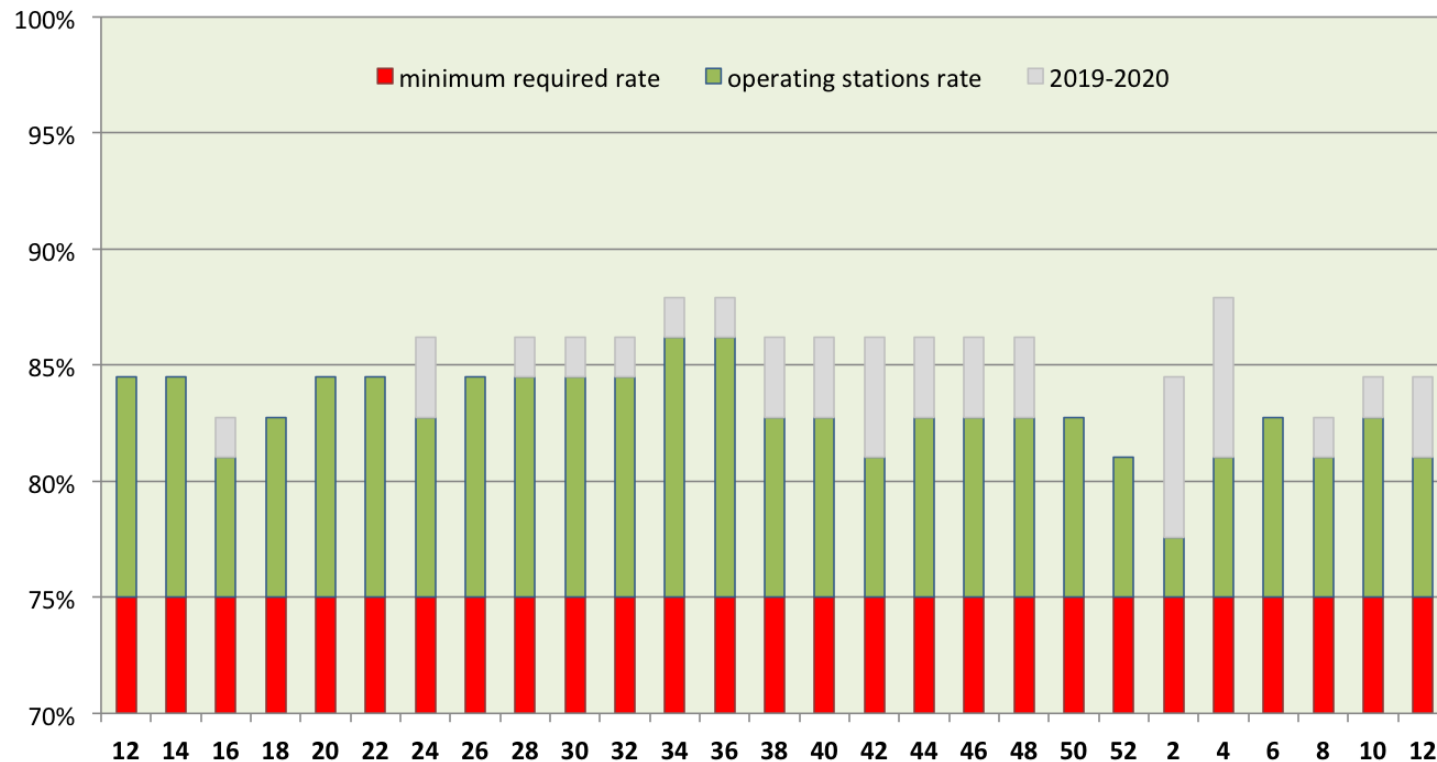

GM 2021 Mar 31 09:29:32    This map was created by IGN-France

📍 60 stations of which: 11 beacons are out of order and 3 decommissioned

# NETWORK AVAILABILITY

- 📍 Despite the difficulties in maintaining the stations due to Covid-19, the ground network holds on!
- 📍 However, the number of operating stations decreased from mid 2020 compared to usual

### Network availability 04-2020 > 04-2021

# NETWORK COVERAGE

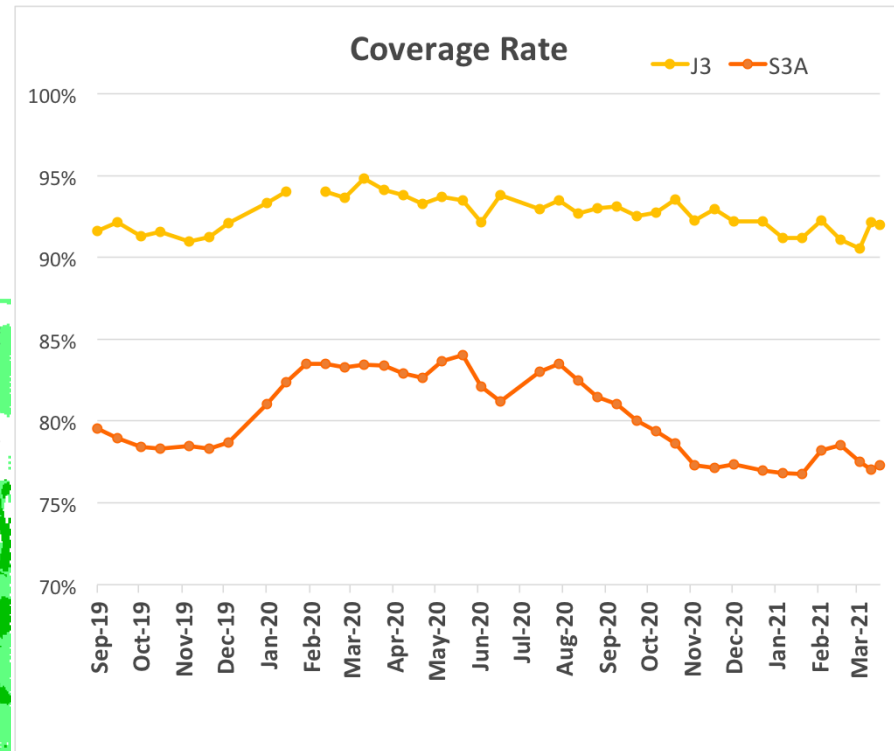

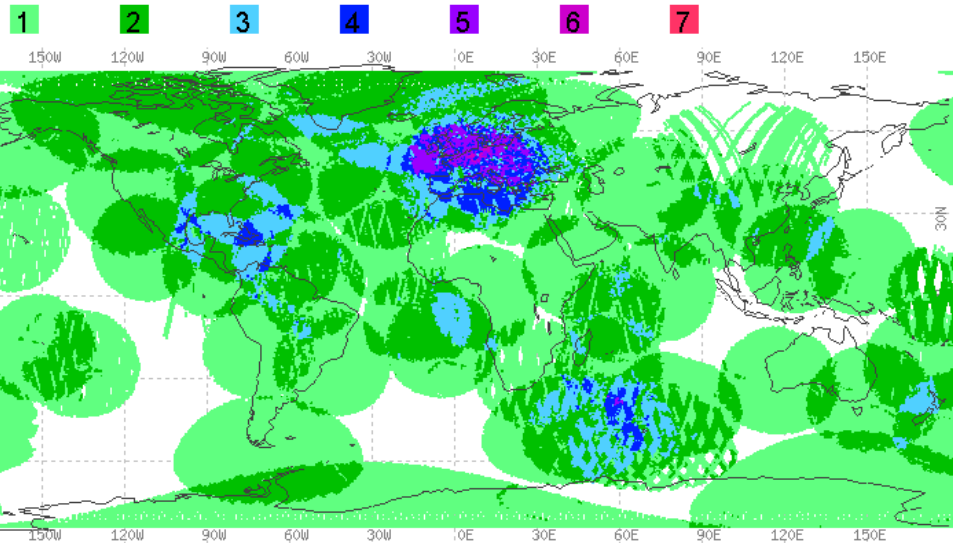

- 📍 As a result of our current difficulties in maintaining the stations in operation
- 📍 The coverage slopes gently down since April 2020

Coverage of SENTINEL3A orbit by the DORIS network

Period processed : from 01/03/2021 to 29/03/2021

Coverage rate : 77,32%

Nb of measurements received by OBSW at each sequence :

From CNES/SALP Data

# NETWORK EVENTS 2020

📍 Several autonomous installation of the 4<sup>th</sup> generation beacon were possible

📍 On-site operations in Europe and French territories

2020	Station		Event
Jan.	MALB	Malé	Reconnaissance with a view to renovate the station
Feb.	REUC	<b>La Réunion</b>	<b>Major renovation</b> (moved 70m south + equipment upgrade)
Mar.	MIAB	<i>Miami</i>	<i>Beacon replacement: 3G &gt; 4G</i>
May	CRQC	<i>Crozet</i>	<i>Beacon and antenna replacement: 3G &gt; 4G + C Antenna</i>
Aug.	MSPB	<i>Mount Stromlo</i>	<i>Beacon replacement: 3G &gt; 4G</i>
Sep.	TLSB	<i>Toulouse</i>	<i>Beacon replacement: 3G &gt; 4G</i>
	HOFC	<b>Höfn</b>	<b>New site in Iceland (replacing Reykjavik)</b>
	GAVC	<b>Gavdos</b>	<b>Reconnaissance with a view to installing new station</b>
Dec.	AMVB	<i>Amsterdam</i>	<i>Beacon replacement: 3G &gt; 4G</i>
	YASB	<i>Yarragadee</i>	<i>Beacon replacement: 3G &gt; 4G</i>

In normal font: on-site operations carried out by IGN

*In italics: operational maintenance (equipment replacement) managed by CNES with the participation of Host Agencies*

# NETWORK EVENTS 2021

 Continuation of autonomous installations of the 4<sup>th</sup> generation beacon where possible

2021	Station		Event
Jan.	KEWC	Kerguelen	<i>Beacon replacement: 3G &gt; 4G</i>
Feb.	GONC	<i>Goldstone</i>	<i>Beacon replacement: 3G &gt; 4G</i>
Mar.	DIOB	<i>Dionysos</i>	<i>Beacon replacement: 3G &gt; 4G</i>
April	KEXC	<i>Kerguelen</i>	<i>Antenna replacement</i>

In normal font: on-site operations carried out by IGN

*In italics: operational maintenance (equipment replacement) managed by CNES with the participation of Host Agencies*

# STATIONS DEDICATED TO IDS

## Wettzell:

Into operation since September 2016

Specificities:

- 📍 **Shifted frequency (k=18) to avoid Doppler collisions**
- 📍 **Automatic stand-by when no DORIS satellite overhead**
- 📍 **Very few low elevation observations (<math><10^\circ</math>)**

Good performance results

## Second IDS dedicated station:

Call for proposals: New DORIS site

- 📍 **Frank, Guilhem and Jérôme are working on it**
- 📍 **Waiting for appropriate time...**

3 requirements:

- 📍 **Potential interest for scientific studies**
- 📍 **Site complying to DORIS installation requirements**
- 📍 **Contribution to geographical coverage (Europe is offside!)**

Potential candidates:

- 📍 **Zhuhai (China), Kanpur (India), Gran Canaria (Spain), Sejong (Korea)**

# NETWORK EVOLUTION

## Scheduled in 2021:

Apr.: **Rothera**, UK Antarctica: 4<sup>th</sup> generation beacon autonomous installation

May.: **Malé**, Maldives: relocation and 4<sup>th</sup> generation beacon installation

Jun.: **Kourou**, French Guyana: 4<sup>th</sup> generation beacon installation

Jul.: **La Réunion**, France, Indian Ocean: maintenance operation (failed equipment)

Aug.: **Rikitea**, French Polynesia: major renovation (antenna move + equipment upgrading)

Sep.: **Gavdos**, Crete, Greece: station installation and site survey

## Short term (2022):

**Katherine**, Australia (co-location GNSS + VLBI): installation 300m away from VLBI

**Easter island**: following site closure in 2015, relocation and hosting migration

**Changchun**, China (co-location GNSS + SLR): disagreement on the financial level

## Longer term:

**Krasnoyarsk**: decommissioning and search for a new site

**Cachoeira, Le Lamentin, Sal, Everest**: antenna relocation and equipment upgrading

**Papenoo**, French Polynesia (co-location GNSS + SLR + VLBI): at a standstill

# NETWORK EQUIPMENT UPGRADING

## 4<sup>th</sup> generation beacon deployment

Slowed down by Covid-19

15 stations now equipped (see list in the next table)

Next on the list: Rothera, Malé, Futuna, Metsahovi, Kourou, San Juan, Djibouti

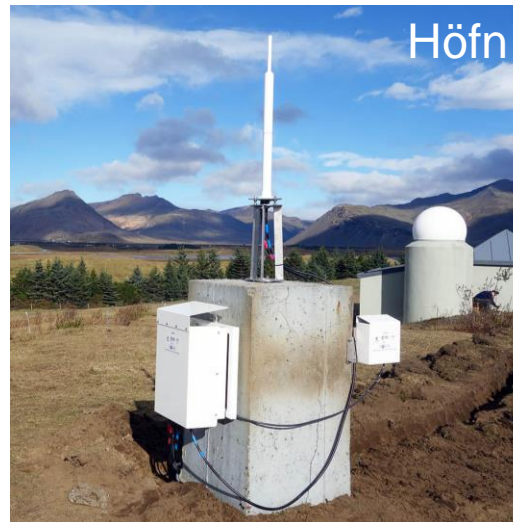

## Gradual replacement of Starec antennae B type with C

Reminder: the uncertainty of the vertical location of the 2GHz phase center is reduced from 5 to 2 mm

21 stations equipped with Starec C: 35% of the network

Last stations equipped with Starec C:

-  Crozet (CRQC)
-  Höfn (HOFC)

# DORIS LOCAL TIE SURVEYS

## CNES/IGN contribution to ITRF2020

Delivery of new DORIS Tie Vectors (SINEX files) to ITRS Center

⇒ 25 site surveys performed by IGN between 2013 and 2020 on the occasion of on-site operations for DORIS or REGINA

N°	Site Ident (DOMES)	Site	Survey Date	GNSS	SLR	VLBI
